

Design

Create a **design document** (PDF) in the design-docs directory describing your site. You will need to convey the following information:

- Name of site/company

Eyeballs Pillow

- Description of your design concept/approach

This is a website that allows users to browse around and look at nice, friendly, soothing images such as cute things or pretty sceneries. Users can then purchase the objects seen in the images. The home page will be a directory that links to the other three pages, going into FAQ, contact, about, and image categories (index.html). The categories will go to another three pages, which will each have their own separate category. The first page will have a bunch of images of cute animals (blog-home-1.html). The second page will have a bunch of pretty landscapes/sceneries (blog-home-2.html). The third/final page will have a bunch of images of fluffy pillows or clouds or simply areas that allow the eyes to visually rest, with light colors and soft-looking images (blog-post.html). The other pages will be standard html's such as the about page, FAQ page, and contact page.

- What you hope to accomplish with your design concept/approach

I hope to accomplish a sense of relaxation or comfort, in which the user can experience the website and relieve stress or enjoy looking at things.

- Other sites you looked at for inspiration (include links)
